

## Microsoft SharePoint 2007 for Developers

Microsoft SharePoint 2007 provides a huge range of functionality including enterprise content management, automation of business processes, and business intelligence and reporting. Although SharePoint is rich in features and capabilities, it involves common concepts and developer tasks that are universal to every type of SharePoint project. This course is designed to provide those who are responsible for customizing and creating new functionality within the platform mastery of these common tasks, including: customization of look and feel through styles, themes, and master pages, controls and web parts, custom pages, creation and deployment of solutions, security, debugging, workflows, custom site definitions, lists, documents libraries, and features. Students who master the contents of this course will possess the knowledge to productively contribute on most types of SharePoint implementation because they will understand the tasks and building blocks required in all types of custom solutions.

**Prerequisites:** This course is designed for individuals with a working understanding of ASP.NET 2.0 and Visual Studio 2005 tools.

### Introduction to SharePoint Development

- Modes of Development: Configuration, Customization and Solution Development
- Site Collections and Sites
- Creating and Customizing Lists and Libraries
- Using Web Part Pages

### Site Columns and Content Types

- Site Columns
- Content Types
- Integrating Site Columns, Content Types, and Lists

- Authentication Mechanisms
- Authorization and Permissions
- Zones

### Forms Based Authentication and Anonymous Access

- Using ASPNetSQLMembershipProvider and ASPNetSQLRoleProvider
- Configuring Anonymous Access
- Creating a Custom Membership Provider

# Innovative Solutions Technology

## **SharePoint Architecture**

- IIS, ASP.Net, and SharePoint
- Page Request Pipeline
- What Happens When a New Web Application is Created
- SPVirtualPathProvider and SPPageParserFilter

## **Features**

- Types of Features
- Feature Scopes
- Feature Activation, Dependencies, and Stapling
- Feature Receivers

## **Solution Development**

- Creating a Development Environment
- Creating and Deploying Solutions
- Common Failure Modes
- Tools and Techniques to Simplify Package and Deployment

## **Tagged Document List Example**

- Provisioning a List with a Feature
- Creating a Lookup Site Column with a Feature Receiver
- Automating Solution Deployment
- Creating Custom List Definitions

## **Site Definitions**

- Understanding Site Definitions
- Creating Custom Site Definitions
- Specify Site Elements and Features Using Onet.xml

## **Styles and Themes**

- Style Basics
- Associating Styles with Pages
- Using and Creating Themes
